TADEJA SAVSKI

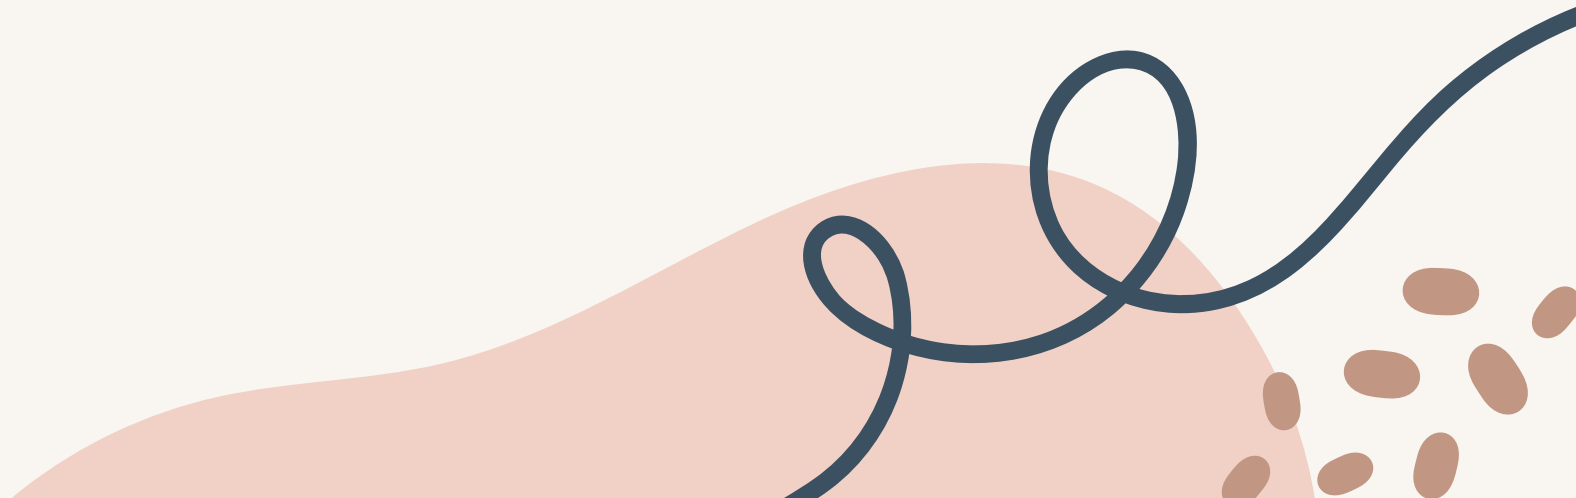

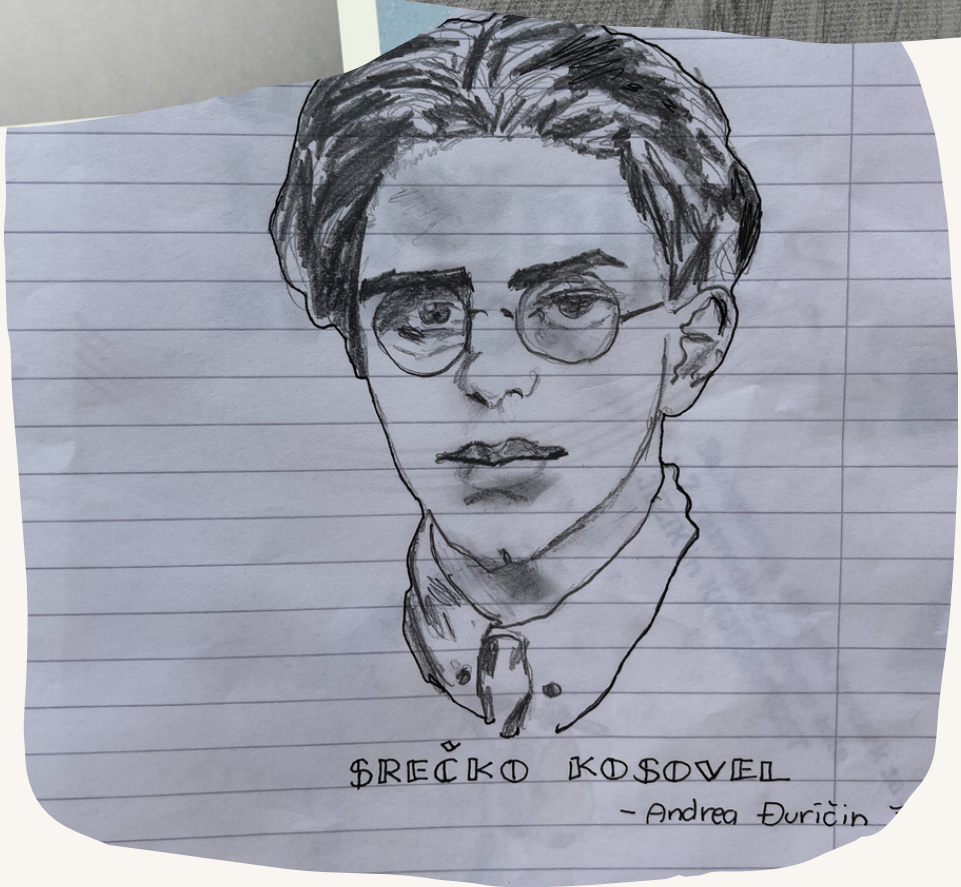

We teach students in fun ways, in groups, through play.

We observe students and help them discover strong areas. In doing so, we encourage them.

We work with students and teachers from different countries (Czech Republic, France, Croatia, Portugal).

We offer foreign language learning (French, German, Spanish) and Esperanto, and we celebrate the International Day of Languages every year.

At school, we host people with different deficits and teach the acceptance of difference.

We were visited by Paralympic Franček Gorazd Tiršek, who won a silver and bronze medal in parachuting in Tokyo.

At the school gym, our guests presented their sports disciplines, sitting volleyball, polygon for the blind, practice with a sounding ball. The seventh-graders competed with the para-athletes in different disciplines.

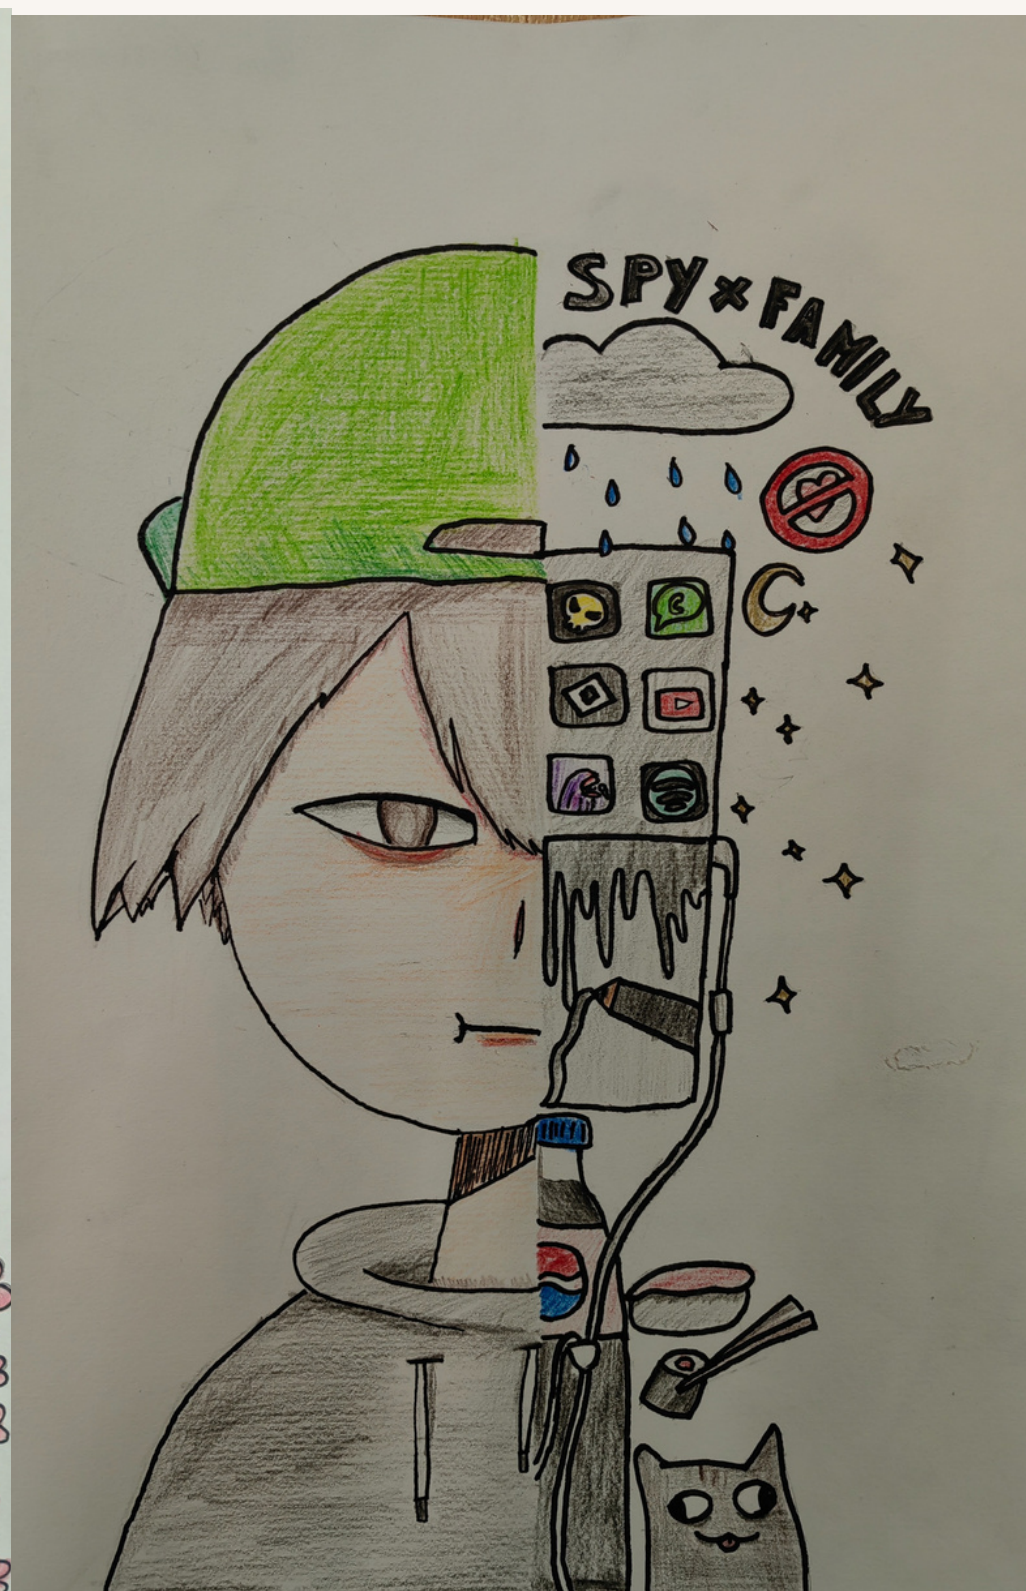

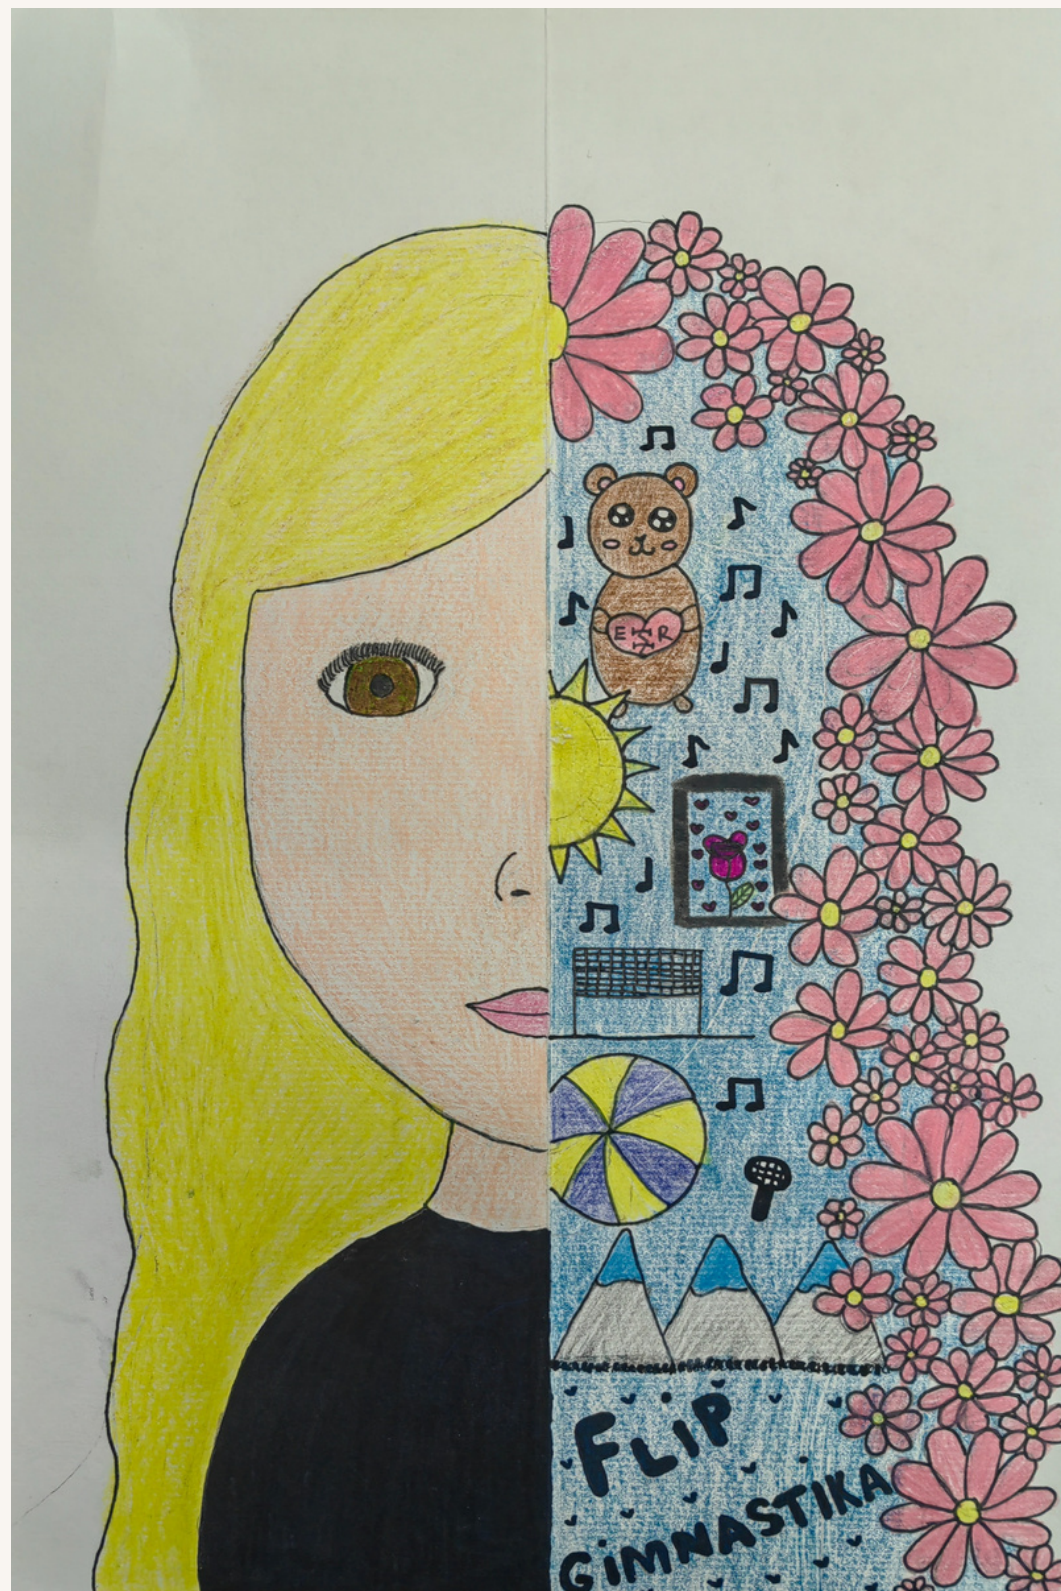

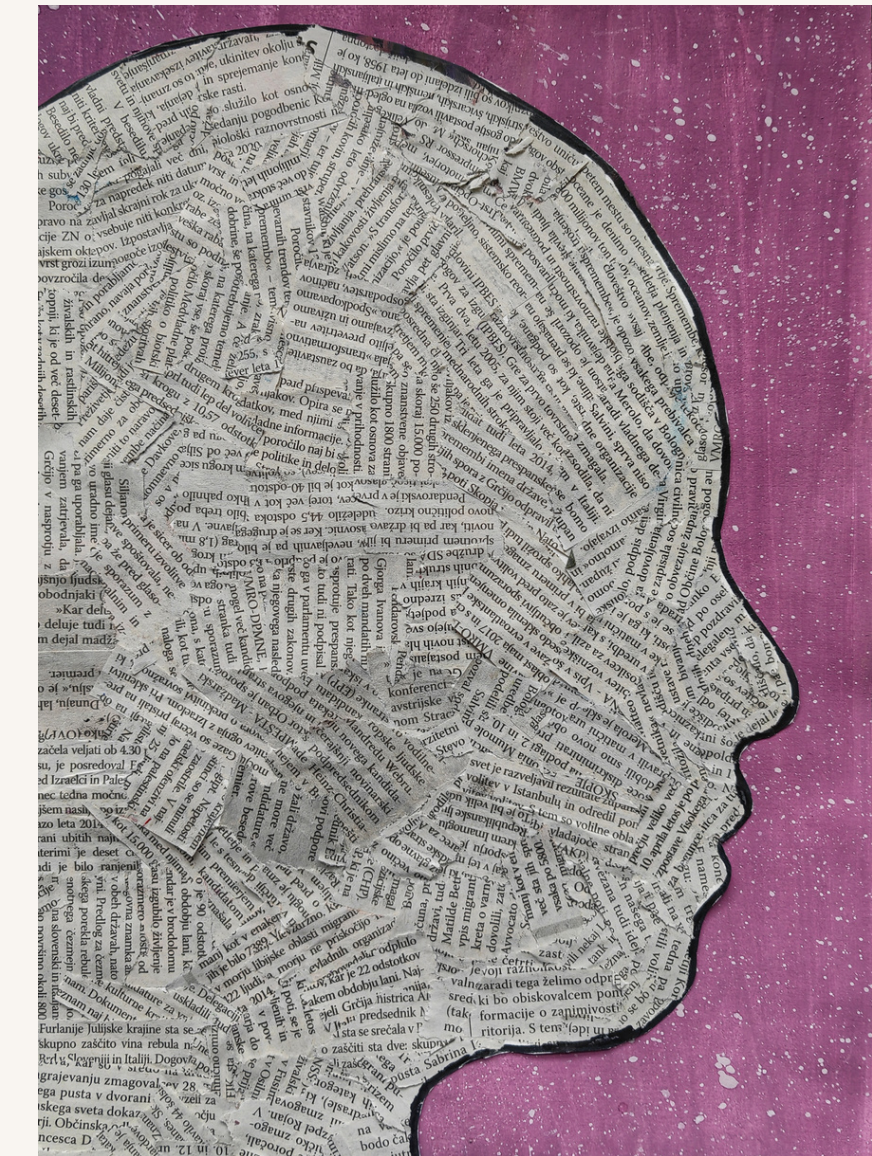

We organize Ukmar's talents, where all students have the opportunity to present their talent.

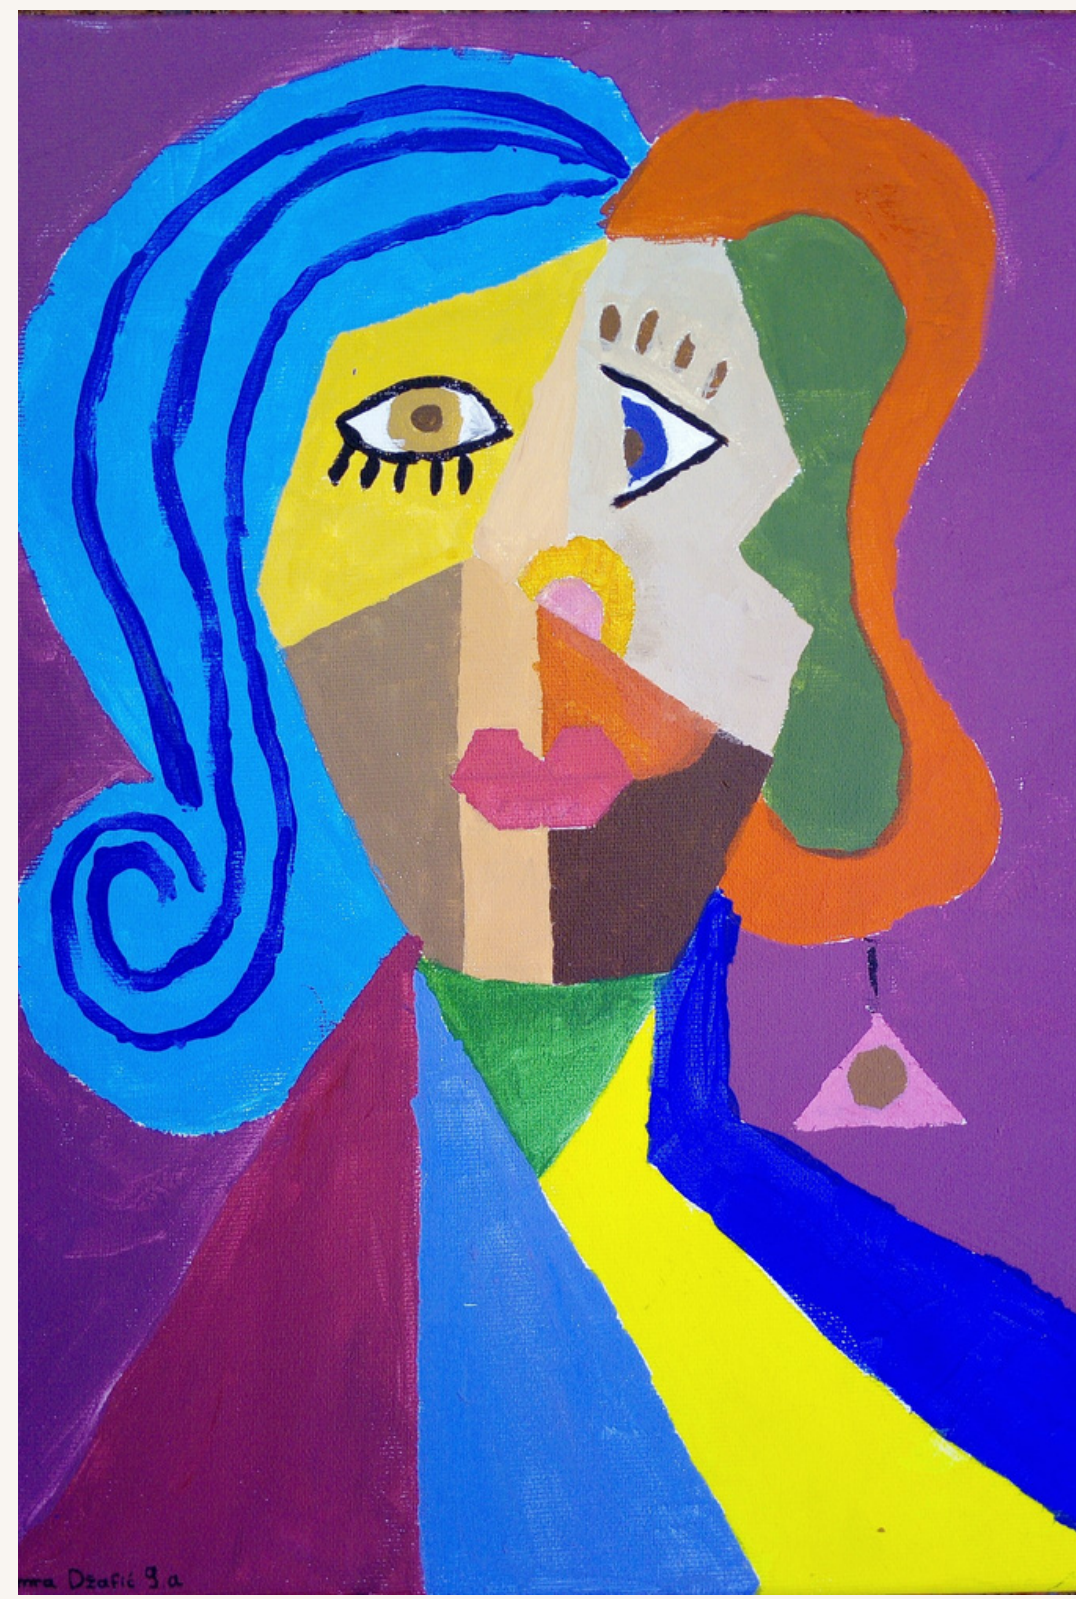

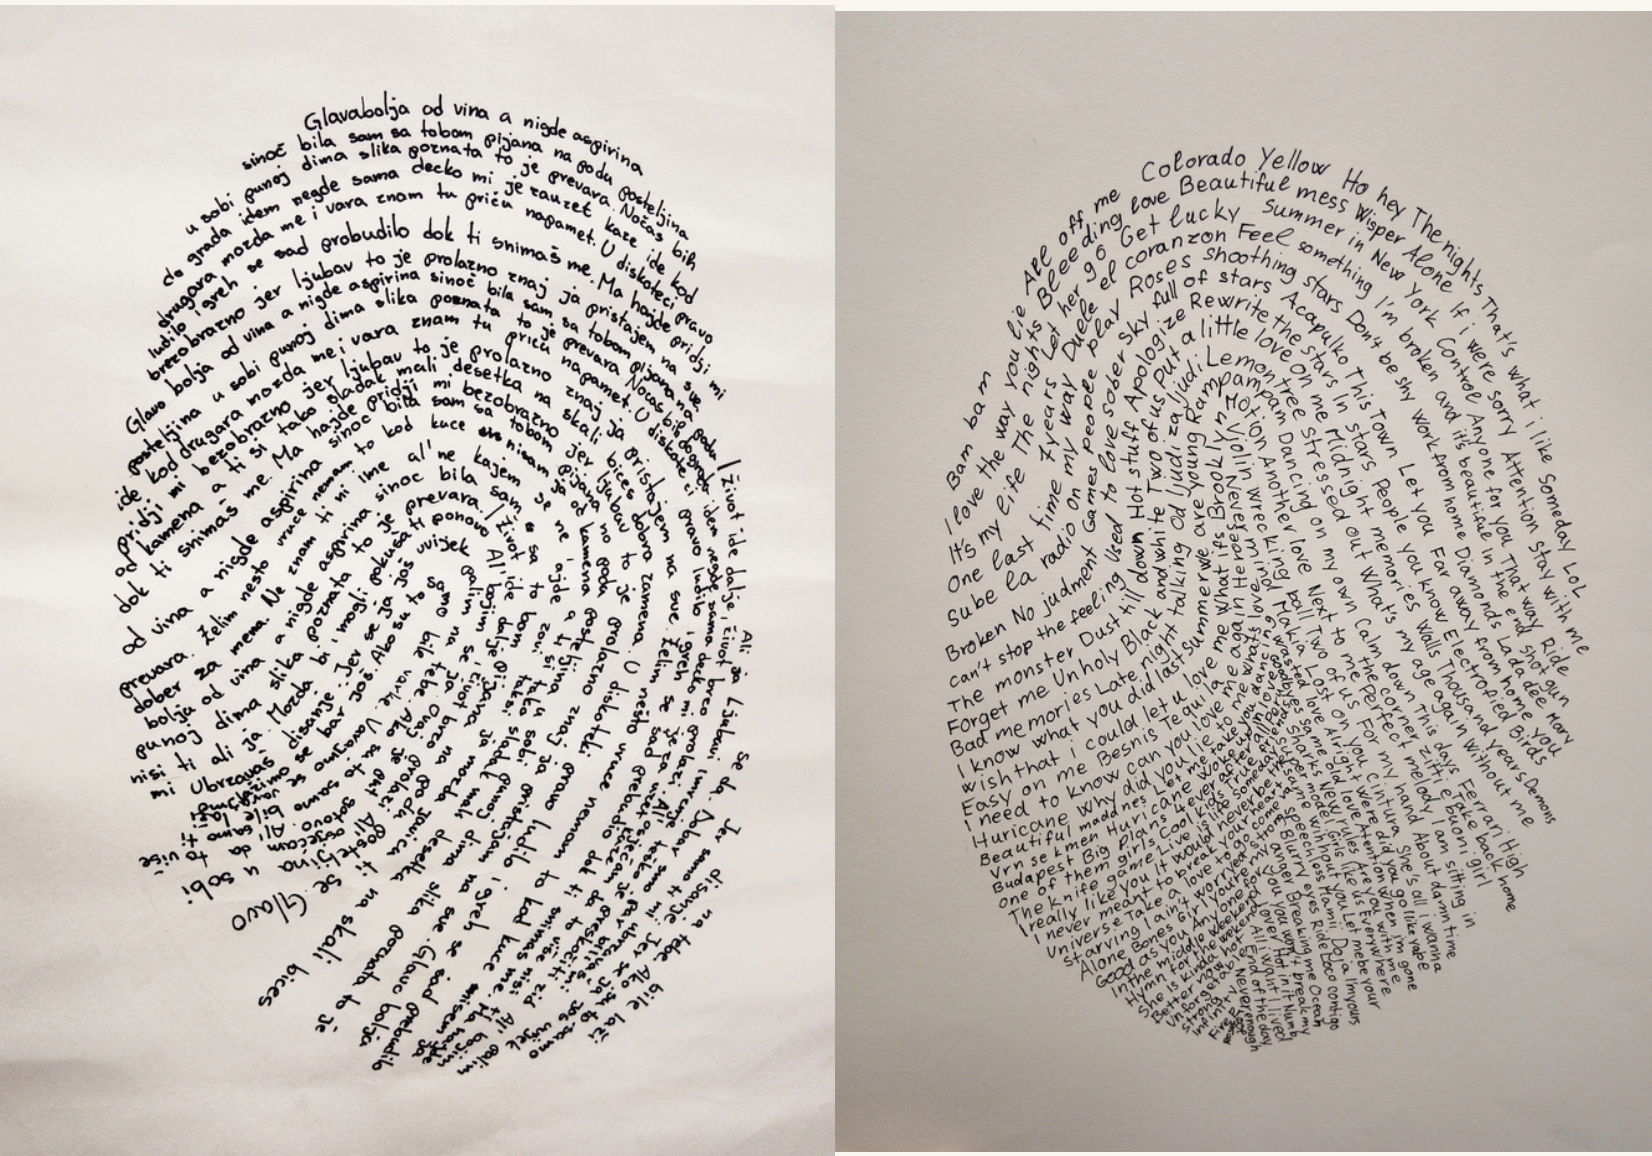

We encourage the use of positive affirmations and words.

We are charitable and make time for the sick and elderly.

We create products on the topic of diversity.

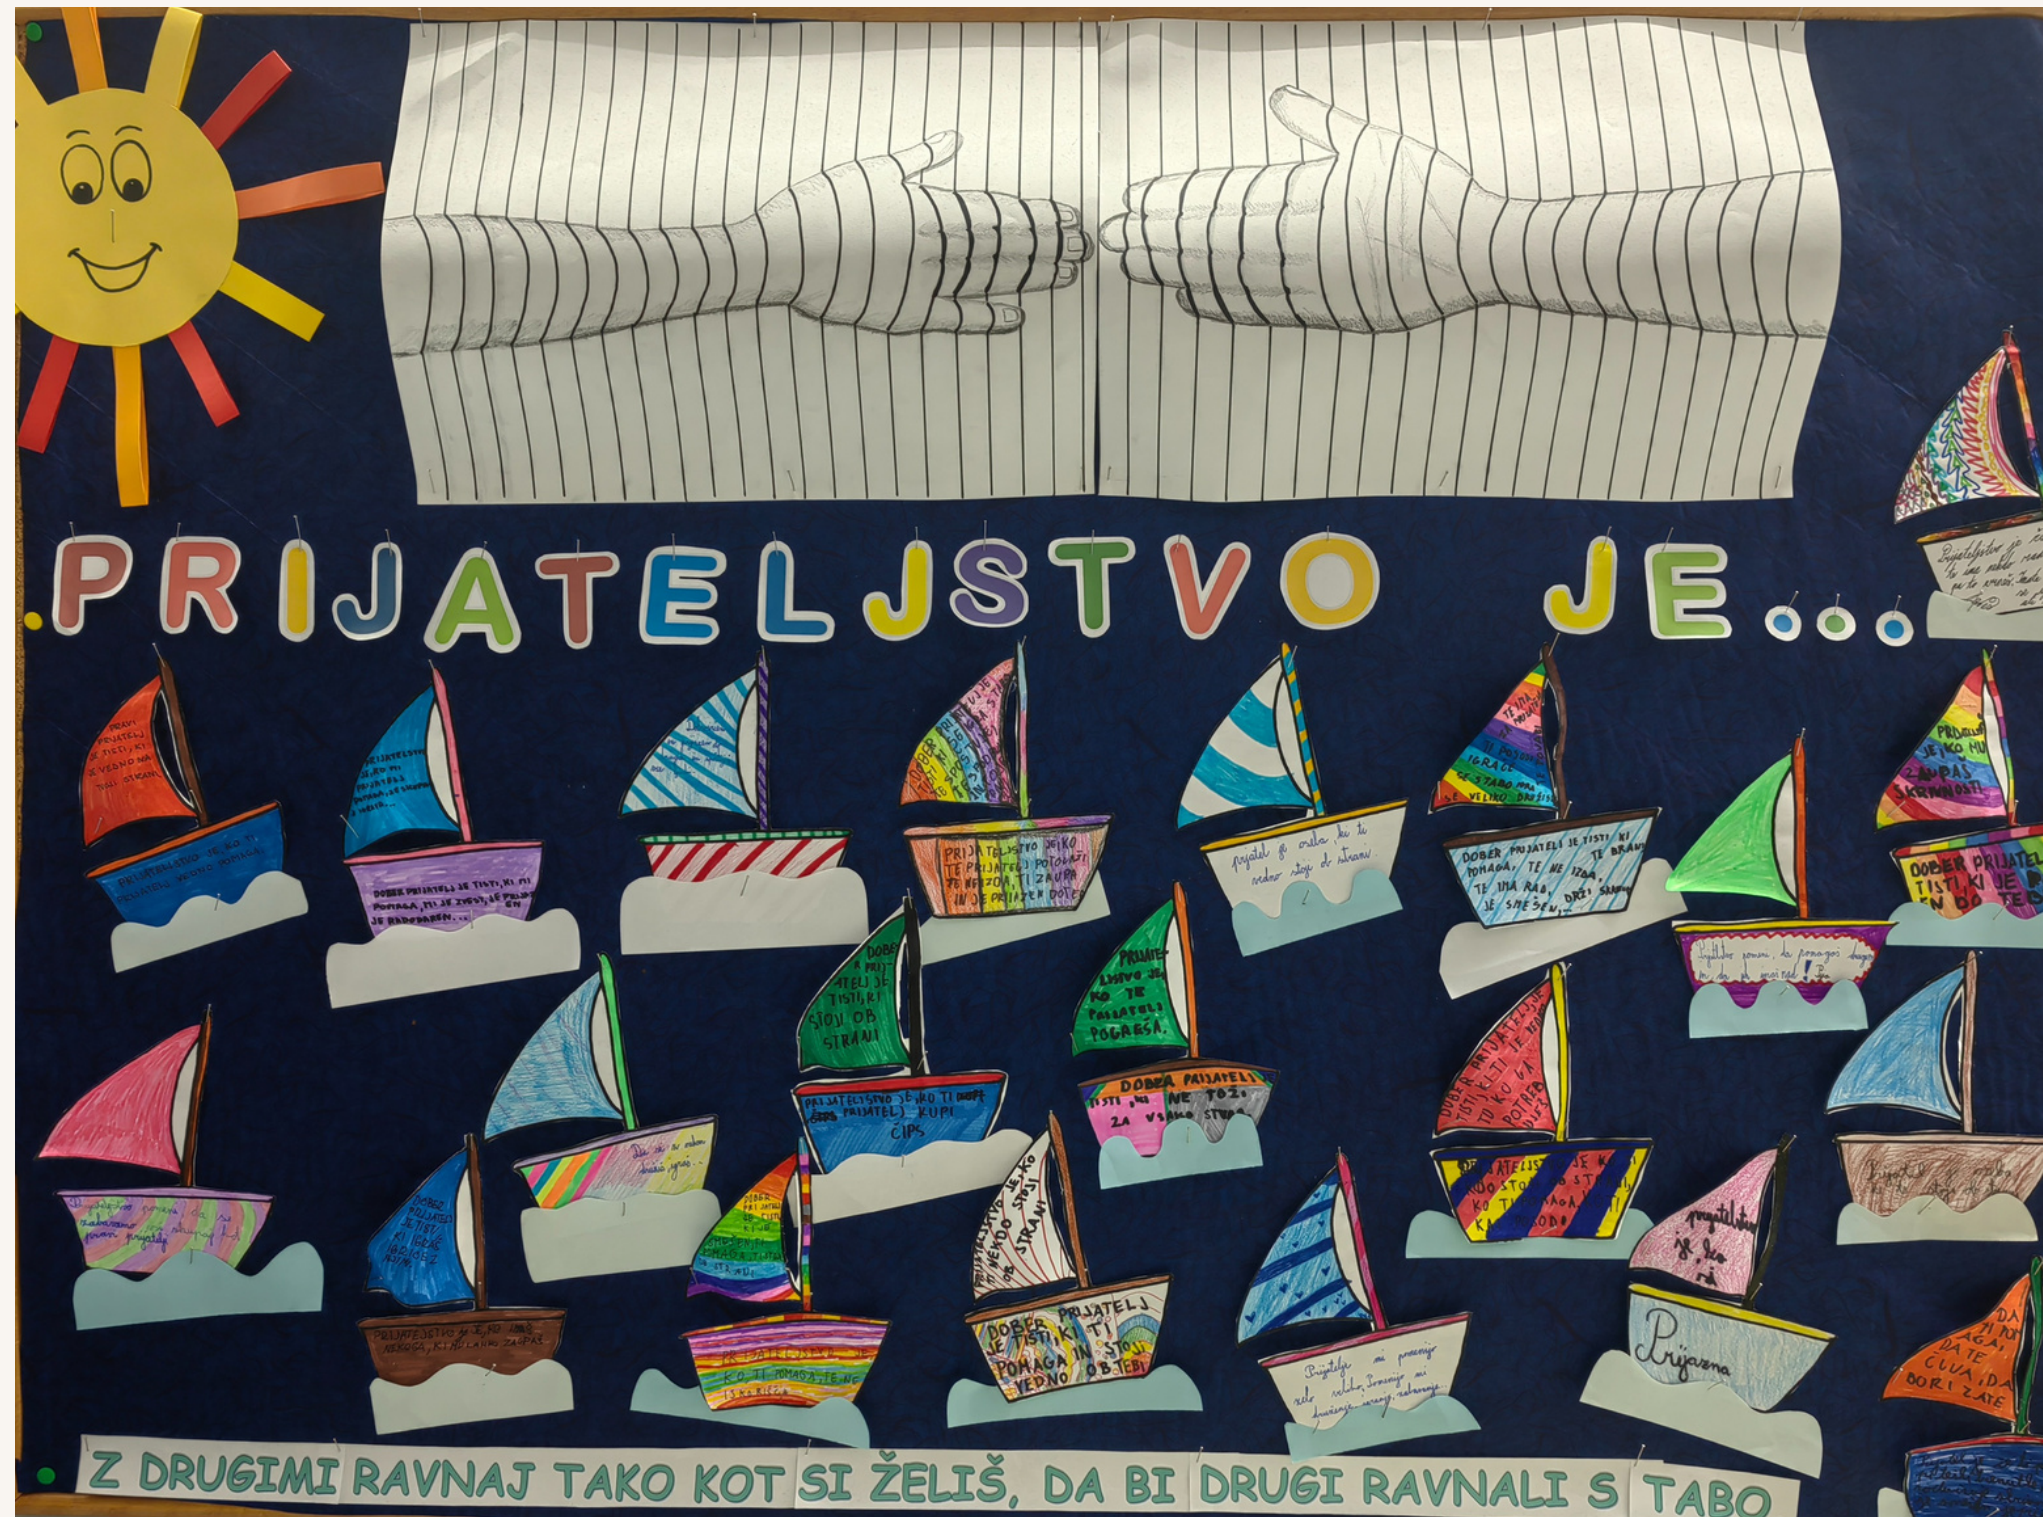

We sing songs in different languages and learn about other cultures.

We organize events on the topic of multiculturalism and get to know the cuisine of other nations.

We think about friendship.

because we are aware that our differences unite us
